Systems Thinking

Systems Modelling

Agile development

Systematic approach v systems thinking

Systematic approach

Divide each difficulty into as many parts as is feasible and necessary to resolve it.

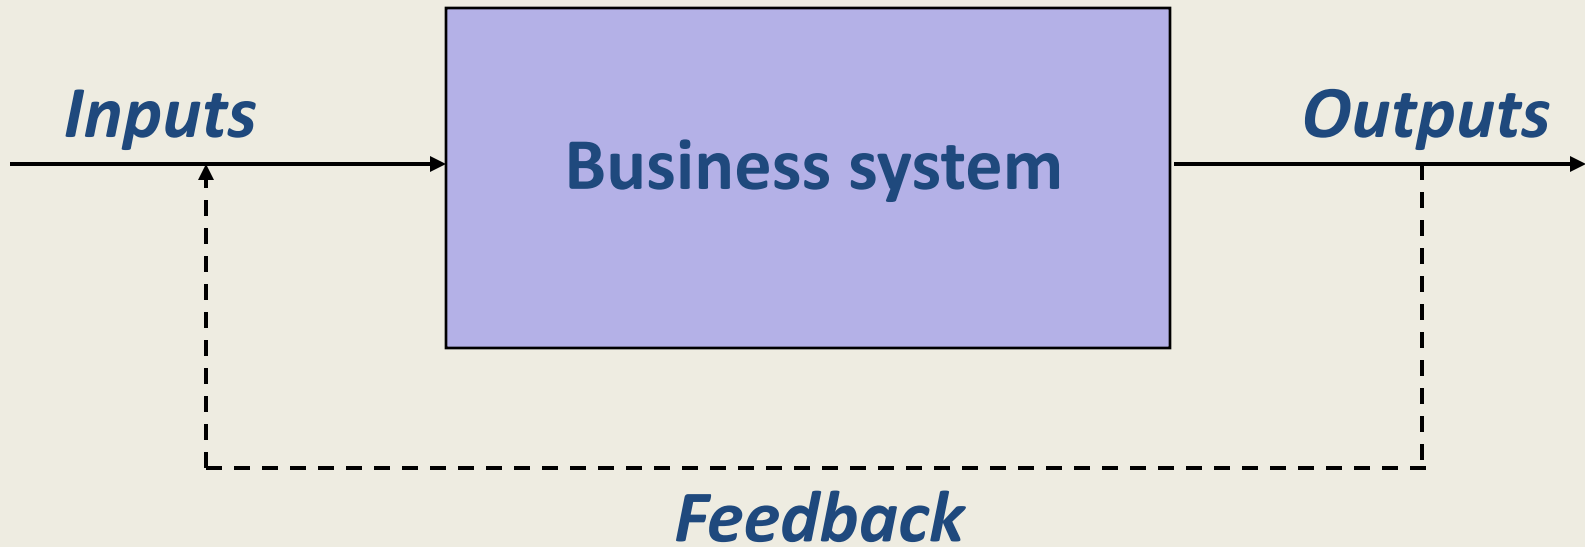

Rene Descartes

Systems thinking (systemic)

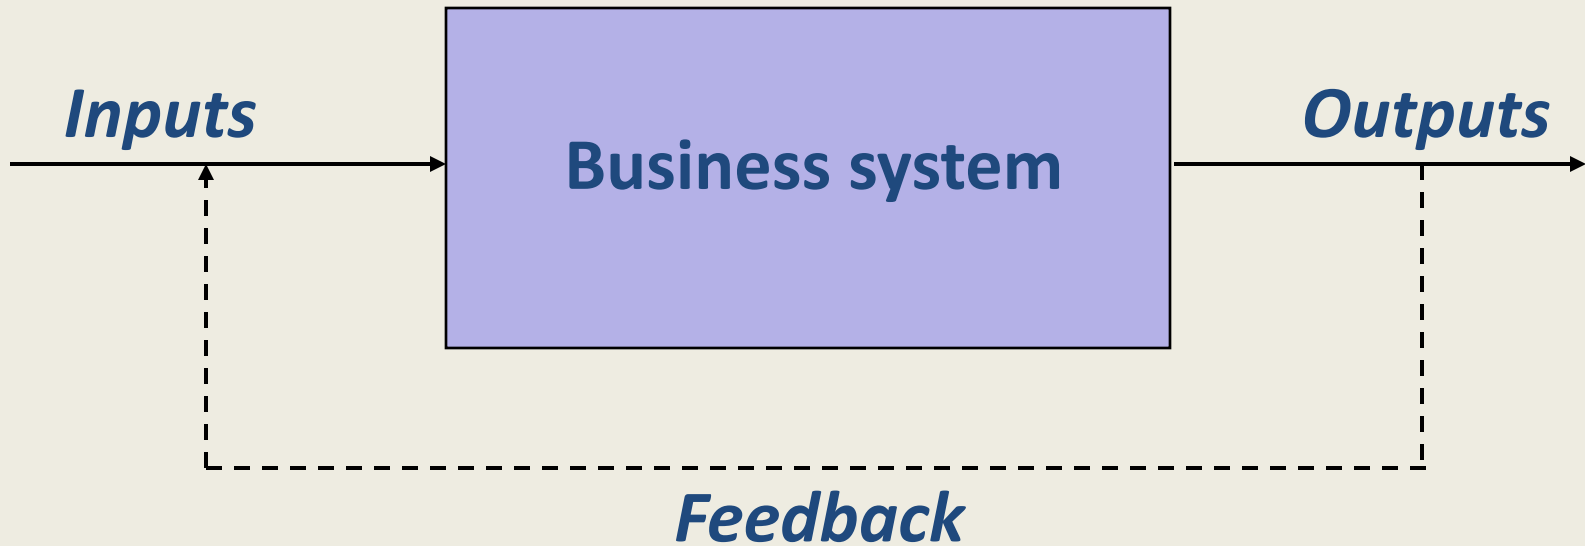

A discipline for seeing wholes.

Peter Senge

Systems thinking

Systems thinking

Systems have feedback loops and the system must react to this feedback

Systems thinking

Systems thinking

Emergent properties of systems

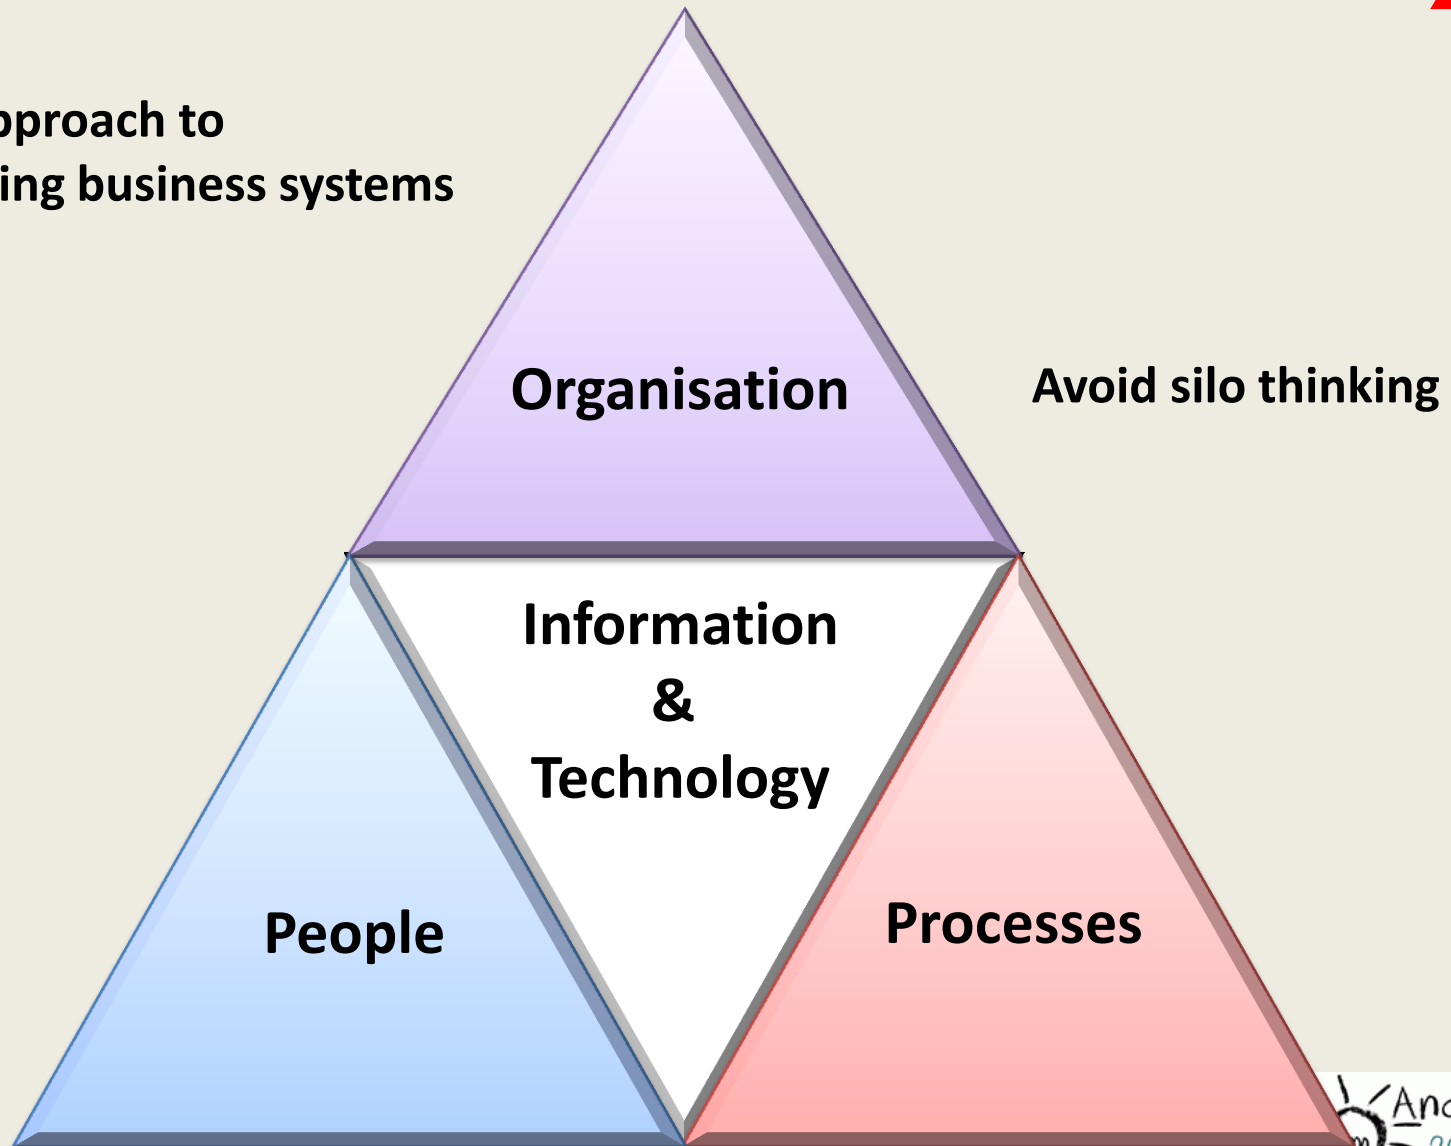

Characteristics that emerge from the system as a whole rather than just by adding up the characteristics of the parts.

POPIT™ – taking a holistic approach

A holistic approach to understanding business systems

Can you see the whole picture?

The story of the six blind men

Can you see the whole picture?

The story of the six blind men

Or is it seven?

Systemic change

Systemic change is one where the impact of any change is considered in respect of the whole ,and the relationships between the individual parts to one another

See the bigger picture

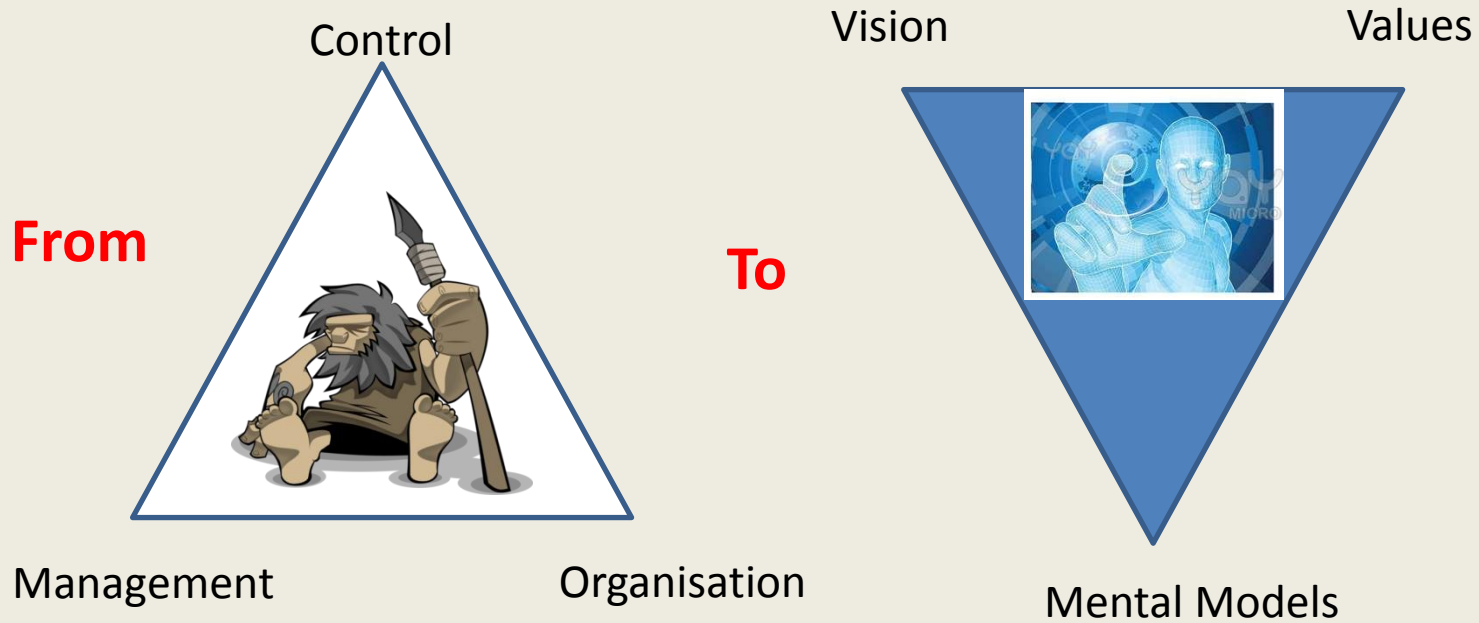

Cause and effect

The solution to one problem may cause another bigger Problem

We may act to produce short term benefits leading to long term costs

The basic disease of the hierarchy

The customer viewpoint...

The organisation

Systems thinking

Customer focus

The customers

Needs

Expectations

High level vision or detailed inspection

We need to get a balance between a long term vision of a possible future

. and the reality of the detail of the current situation.

Clarity of Vision

“In every block of marble I see a statue as plain as though it stood before me, shaped and perfect in attitude and action. I have only to hew away the rough walls that imprison the lovely apparition to reveal it to the other eyes as mine see it.”

Michelangelo

Mental Model

Systems thinking without mental models is like flying without navigation

It involves:

- Holistic thinking
- Backward thinking

Simplicity and completeness of the solution

“Things should be done as simple as possible – but no simpler”

Albert Einstein

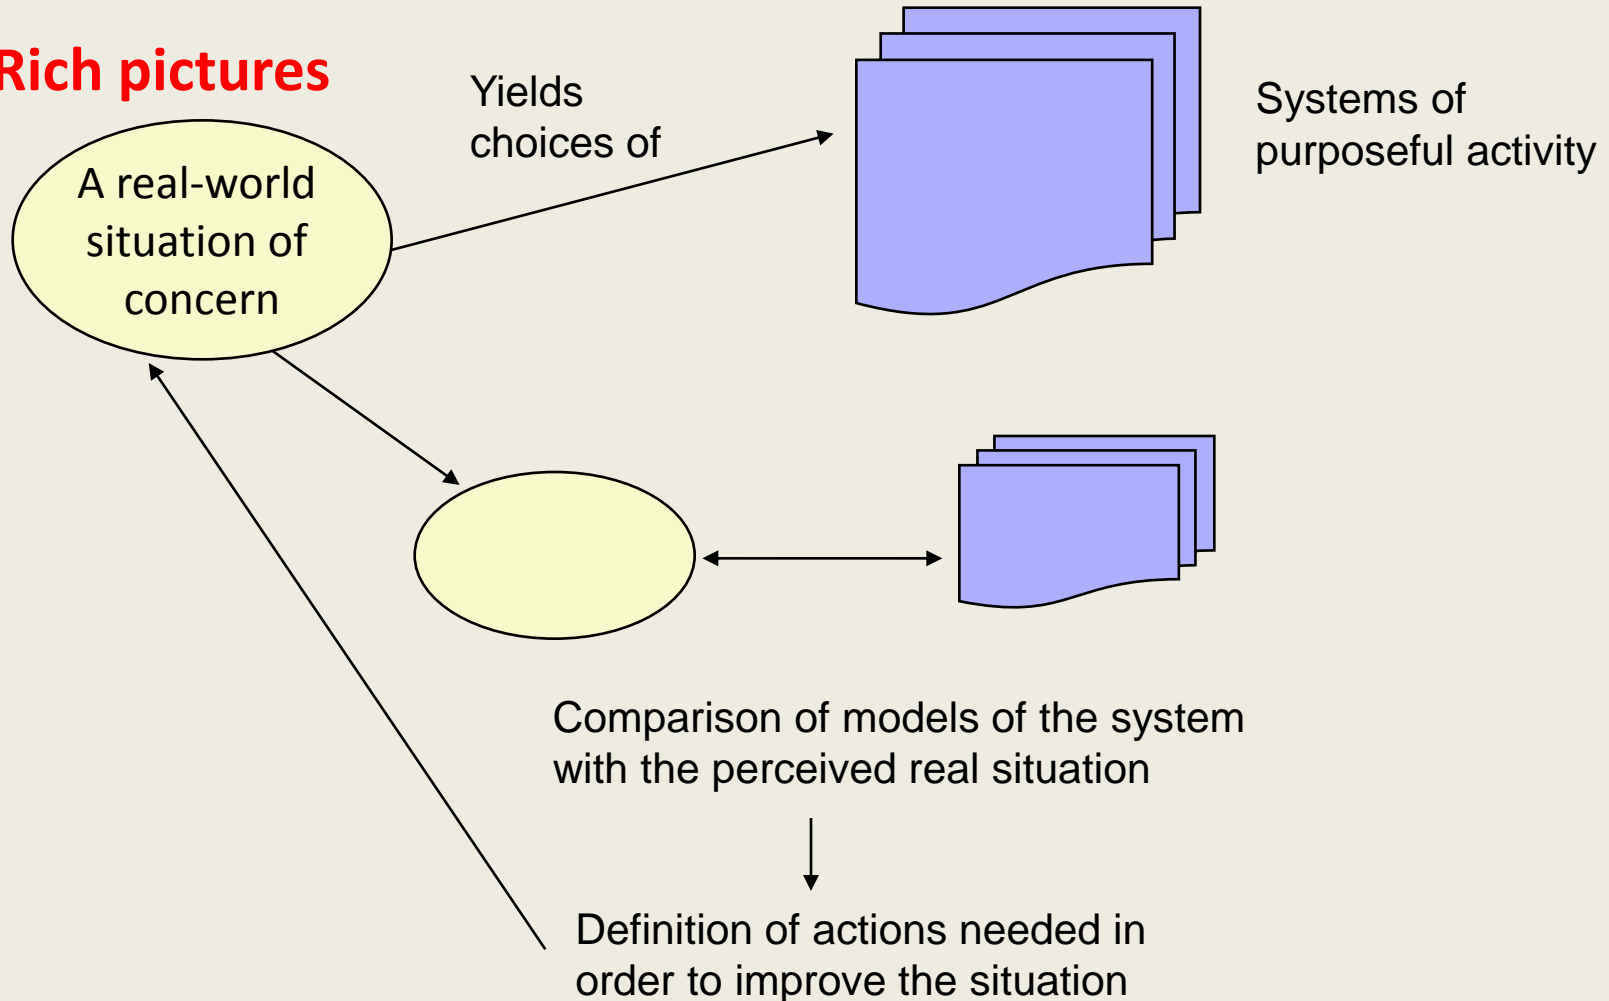

Think outside the box.

What box?

Soft Systems Methodology

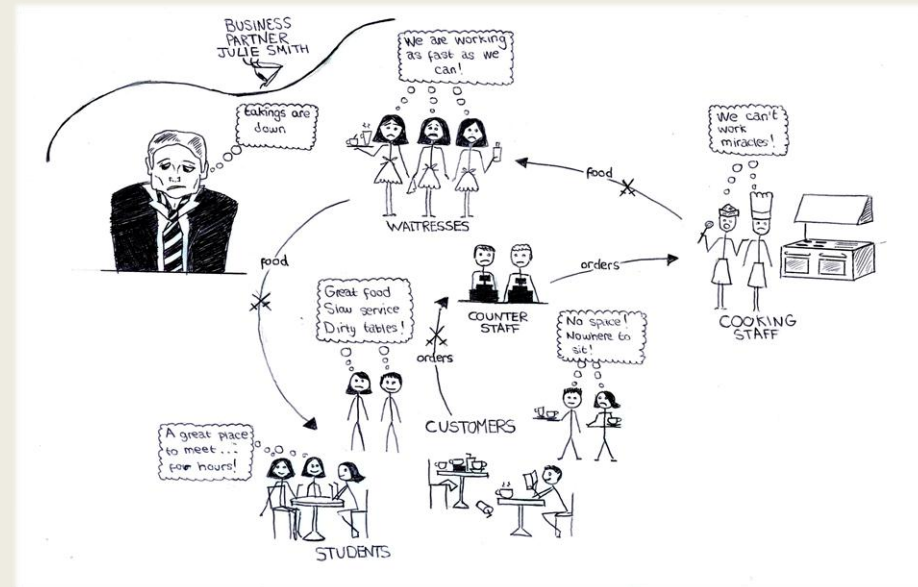

Rich pictures

Rich Pictures

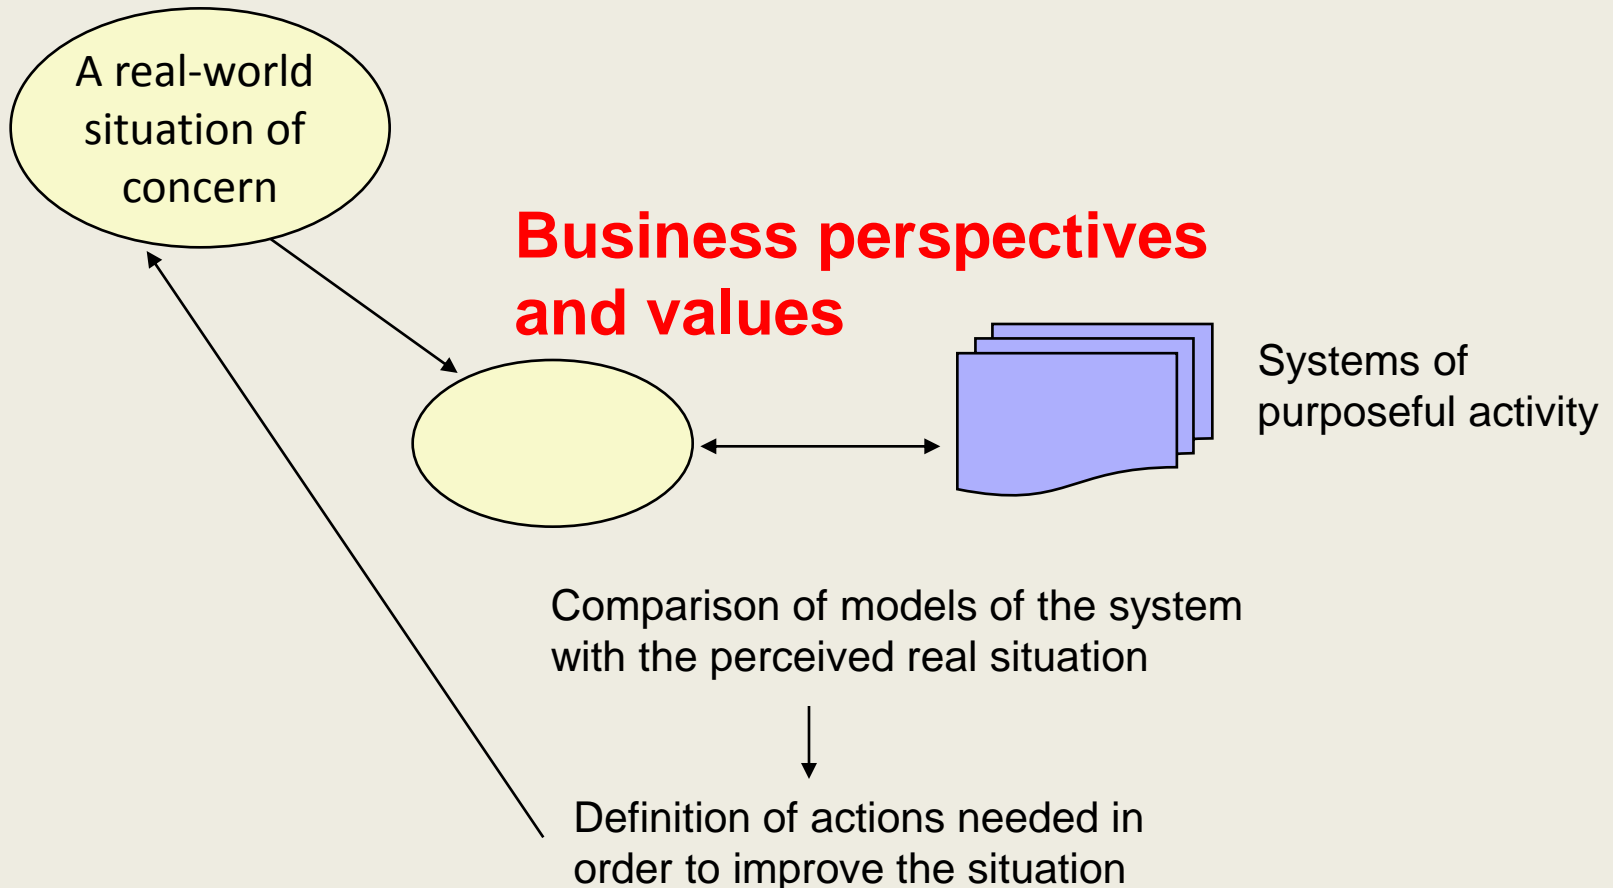

A picture is worth a thousand words

Soft Systems approach

Rich pictures

Business Perspectives and values

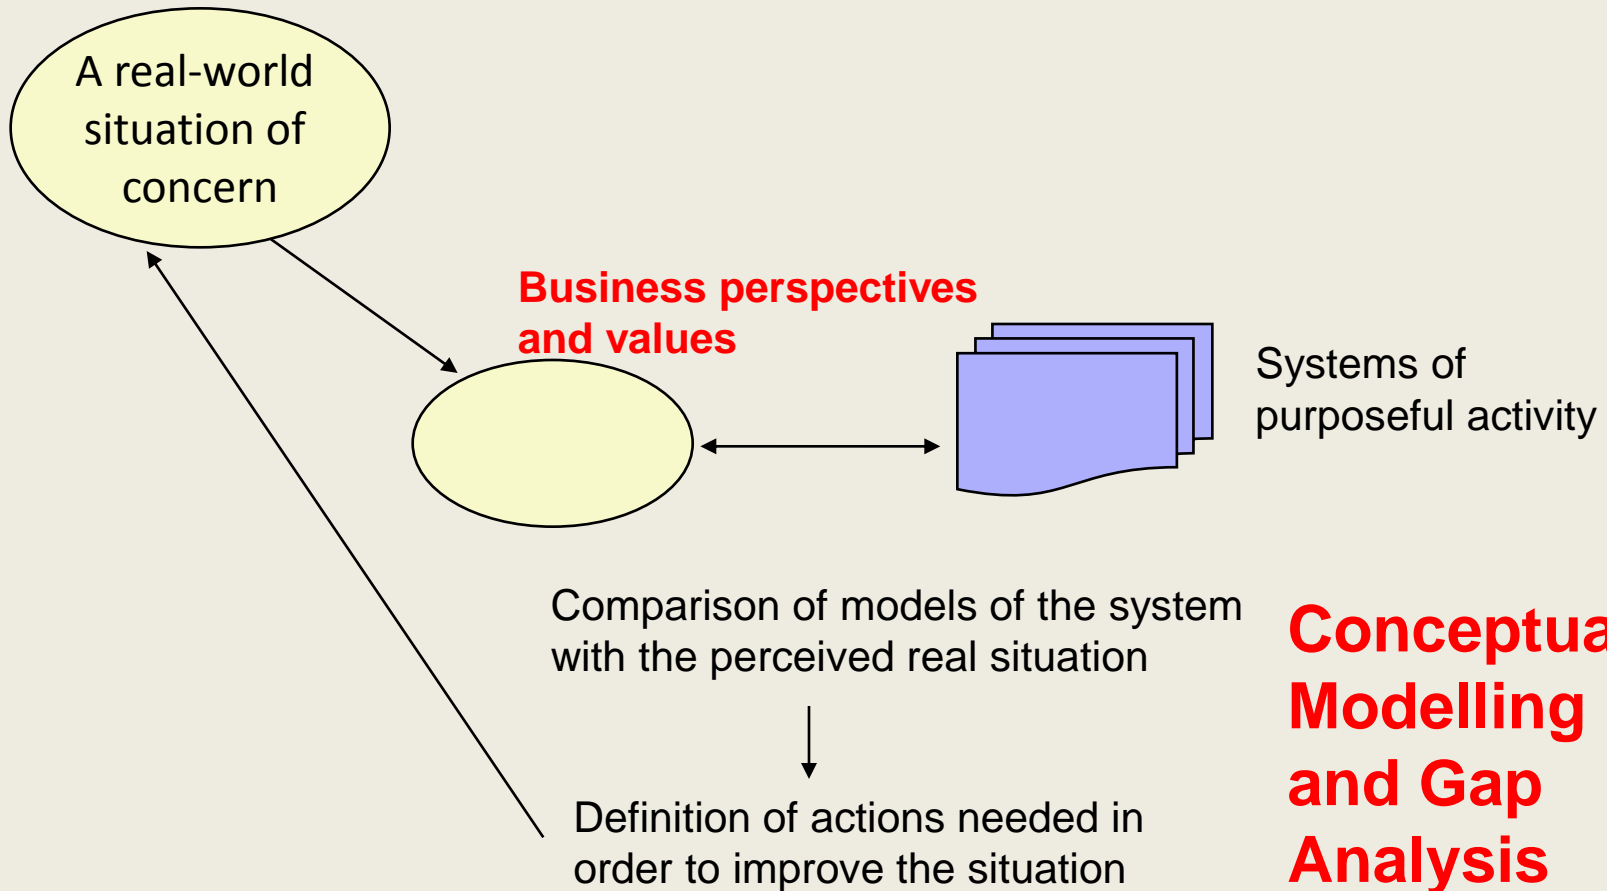

You're right from your side
and I'm right from mine

Bob Dylan

Conceptual Modelling and Gap Analysis

Where are we now?

Conceptual Modelling and Gap Analysis

Where do we want to be?

Conceptual Modelling and Gap Analysis

How are we going to get there?

How will we know we have arrived?
