#493 Website mockups for Modularity WG

Created 3 months ago by duffy
Modified 3 months ago

Summary:
The modularity working group would like a set of mockups and high-level design (specs/sitemap diagram/etc) for a Fedora modularity website aimed at enterprise devops needing separate software stacks (what modularity provides) or other folks who are playing with the technology. It is meant to be an 'external' facing branding/marketing/outreach site.

Implementation:
asamalik will be implementing. Team will likely use docs.pagure.io for deployment.

Timeline:
Fedora 26 (June 2017)

Contacts:
@torling - moto-timo - Tim Orling (modularity wg liaison to design team)
@asamalik - asamalik (developer)

duffy 3 months ago

Rough cut plan of action:

1. Examine current modularity WG wiki page and catalog content (https://fedoraproject.org/wiki/Modularity_Working_Group)
2. Draft interview questions for modularity working group to better understand needs / problems-to-solve of target audience. Identify interview subject with liaison.
3. Conduct interview; identify areas of need for which there is no modularity content.
4. Create draft high-level site map (example: <https://github.com/developer-portal/mockups/blob/master/Meta/Sitemap.png>).
5. Create draft front page / subpage mockups. Use filler content.
6. Share site map and mockup drafts with WG for discussion.
7. Working with liaison, task WG to produce needed content.
8. Iterate mockups and sitemap; fill in content as provided.
9. Feedback <=> Iterate loop
10. Pass on to asamalik to begin implementation; assist with CSS/HTML as necessary.

ЗАПИСЫВАТЬ ВСЁ! ЧЁТКО СТАВИТЬ ЗАДАЧИ!

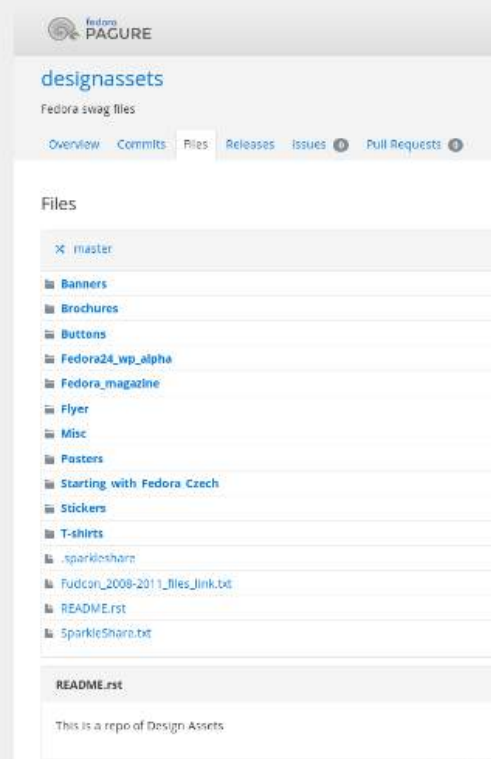

FEDORA HUBS (В БУДУЩЕМ)

The screenshot shows the Fedora Hubs interface for user 'tatita' (Maria Tatita Skandis). The top navigation bar includes 'designteam', 'ambassadors', 'marketing', 'LATAM', 'planet', 'announce', 'fedoranet', and 'welcome'. The main content area displays a list of notifications:

- Fedora LATAM Ticket #347 - Request for Fedora Swag: Ticket #347 has been assigned to you!
- mizma mentioned you in a posting.
- gnokii replied to your post.
- You have a new sponsorship request for the design-team group!
- ryanlerch, banas, and 10 other people liked your post! "Here is an awesome plan for Fedora marketing..."
- A new linkcape package is ready for testing! linkcape-0.48.5-5.fc21 bugfix update ...
- You've earned a new badge! Apprentice (Badge Artist I): You designed a Fedora Badge! Welcome to Florence, apprentice badge artist.
- Ask Federal says your answer was selected as correct! Question: "How can I install GIMP plugins?"
- Ask Federal says your answer was selected as correct! Question: "How can I install GIMP plugins?"
- Design Team Ticket #425 - Flock Lego T-shirt: You've been mentioned in a ticket.

КОЛЛЕКЦИЯ МАТЕРИАЛОВ

The screenshot shows the Fedora PACURE 'designassets' repository page. The repository is for 'Fedora swag files'. The navigation tabs include 'Overview', 'Commits', 'Files', 'Releases', 'Issues', and 'Pull Requests'. The 'Files' tab is active, showing a list of files:

- master
- Banners
- Brochures
- Buttons
- Fedora24_wp_alpha
- Fedora_magazine
- Flyer
- Misc
- Pasters
- Starting with Fedora Czech
- Stickers
- T-shirts
- .sparkleshare
- Fudcon_2008-2011_files_link.txt
- README.rst
- SparkleShare.txt

Below the file list is a 'README.rst' section with the text: "This is a repo of Design Assets".
