Result

```
LDAP Search is started ....
Host = ldap.uconn.edu
Port = 636
Connection Type = SSL
Timeout = 10 seconds

STEP 1 => Performing LDAP-SSL initialization
LDAP SSL initialization completed

STEP 2 => Connecting to LDAP server using the given credentials...
LDAP bind completed successfully.

STEP 3 => Searching on the server ...
```

samba-tool

```
root@adc1:~# samba-tool -h
Usage: samba-tool <subcommand>

Main samba administration tool.

Options:
  -h, --help          show this help message and exit

Version Options:
  -V, --version      Display version number

Available subcommands:
  dbcheck      - Check local AD database for errors.
  delegation   - Delegation management.
  dns          - Domain Name Service (DNS) management.
  domain       - Domain management.
  drs          - Directory Replication Services (DRS) management.
  dsacl        - DS ACLs manipulation.
  fsmo         - Flexible Single Master Operations (FSMO) roles management.
  gpo          - Group Policy Object (GPO) management.
  group        - Group management.
  ldapcmp      - Compare two ldap databases.
  ntacl        - NT ACLs manipulation.
  processes    - List processes (to aid debugging on systems without setproctitle).
  rodc         - Read-Only Domain Controller (RODC) management.
  sites        - Sites management.
  spn          - Service Principal Name (SPN) management.
  testparm     - Syntax check the configuration file.
  time         - Retrieve the time on a server.
  user         - User management.
  vampire      - Join and synchronise a remote AD domain to the local server.

For more help on a specific subcommand, please type: samba-tool <subcommand> (-h|--help)
```

LDAP Browser

The screenshot displays the LDAPSoft LDAP Admin Tool interface. The left pane shows a directory tree for the domain `dc=test,dc=com`. The right pane shows the details for the selected entry `cn=new204testuser13`.

Apache Directory

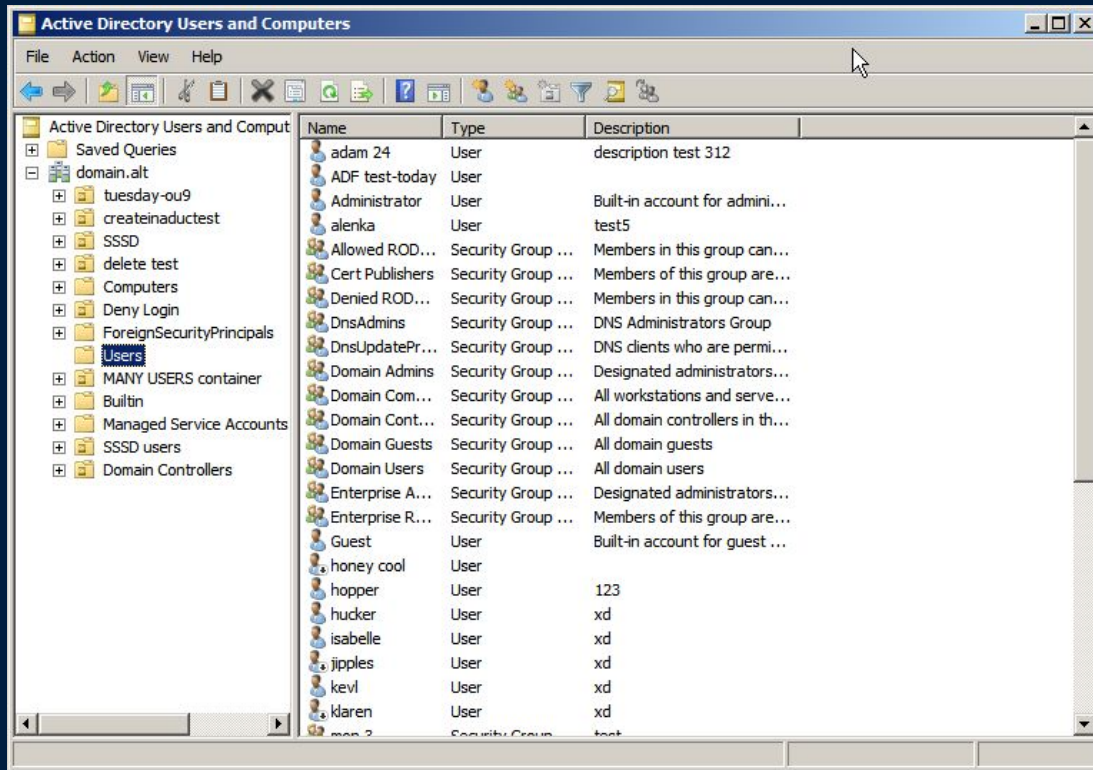

The screenshot displays the LDAP Studio application interface. The main window is titled "LDAP Studio" and contains several panes:

- LDAP Browser:** Shows a tree view of the directory structure. The selected entry is `uid=pcruise,ou=People,dc=example,dc=com`.
- Entry Editor:** Displays the LDAP entry details for `uid=pcruise,ou=People,dc=example,dc=com`. It shows a table of attributes and their values.
- Modification Logs:** Shows the log of the last modification operation.

Attribute	Description	Value
<i>objectclass</i>	<i>inetOrgPerson (structural)</i>	
<i>objectclass</i>	<i>organizationalPerson (structural)</i>	
<i>objectclass</i>	<i>person (structural)</i>	
<i>objectclass</i>	<i>top (abstract)</i>
